For Immediate Release

Maestro Technologies now certified REMARKABLE EMPLOYER!

Varenes, February 14, 2018 – Maestro Technologies is pleased to announce that we have earned the **Remarkable Employer**[®] (www.employeurremarquable.com) certification, which acknowledges high-quality workplaces.

This certification, granted by the Bureau de normalisation du Québec (BNQ), is awarded following a rigorous process. It demonstrates an organization's commitment and ability to enforce internal management best practices. Furthermore, it allows certified entities to promote themselves with the **Remarkable Employer**[®] logo, an undeniable advantage when attracting, recruiting, motivating, and retaining superior employees in a time when labour is scarce.

Every employee participated in a corporate survey that identified these eight items as the company's greatest strengths:

- **Work atmosphere and quality of life;**
- **Recognition of work well done;**
- **Employees' involvement in decision-making;**
- **Compensation and employee benefits;**
- **Managers' capacity to motivate and inspire the staff;**
- **Employer's reputation;**
- **Excellent work-life balance;**
- **Warm welcome and structured integration plan for new employees.**

To Mr. Robert Meunier, president of Maestro Technologies, **Remarkable Employer**[®] is more than a certification: *"Above all, it confirms that our employees appreciate our positive employee management. In addition, the process allowed us to pinpoint some areas requiring attention, such as our relationships with our staff, and implement an improvement plan. Remarkable Employer[®] is a quality brand that also reflects on our management practices. It validates, bestows a seal of approval on the values that represent us and that we hold dear. We are very proud of this achievement and will continue our efforts to achieve excellence! Moreover, we are confident it will play a role in keeping our current talent within our organization and attract new one. On a personal level, I am very proud and grateful to every Maestro employee."*

What is the BNQ?

Created in 1961, the Bureau de normalisation du Québec (BNQ) is mandated by the government to oversee standardization in Quebec. Dedicated to the economic and social advancement of Quebec, it identifies needs, develops normative strategies and its relevant standards, sets up certification programs, and acts as Quebec's spokesperson on the Standards Council of Canada.
