

maestro* human resources

Human resources management made easy with **maestro*HUMAN RESOURCES**: whether it's training, certification and license monitoring, recording comments or warnings in employee files, or handling correspondence.

Take advantage of adaptable fringe benefits management, and so much more.

Key features

Certification management

Skills validation

Assessment management

Regional location

Events tracking

Accumulator tracking

Integrated with dispatch and mobile features

Mobility

Ensures that teams are managed efficiently and information is shared and accessed instantly, wherever you are!

The integration of the Human Resources module to maestro*MOBILE provides access to the following in real time:

- Certifications (original documents)
- Skills
- Employee assessment

Dispatch

You can link specific skills and certification requirements to every project where human resources may need dispatching.

The Dispatch option in maestro* makes it easy to dispatch workers to service calls, work orders or construction projects. Optimize your workforce dispatching based on competency, availability and certifications, as well as project-specific certification requirements. You can even pinpoint the location of employees in real time, all day!
