

## Keep it simple and splendid.

**maestro<sup>®</sup> DRILLING & MINING** is a fully integrated software solution designed to help mining companies manage expense points, exploration, proof and production with streamlined efficiency.

With maestro<sup>®</sup>, you can record crew time, coring time, casing expenses, equipment usage and other expenses that will be automatically propagated to payroll, inventory and accounts payable. Each mine or hole can be set up as a project, complete with a budget. Actual, accrued and committed costs can be monitored in real time against each project. Revenue from excavated materials can be recorded through sales transactions and directly in each project. Avoid cost overruns with maestro<sup>®</sup>'s proven intelligent management.

 The power of simplicity.

## Maestro\* offers advanced solutions you can rely on.

### Numerous tools designed to improve the user experience:

- Drill-down to access transaction details
- Multi-table list generator
- Integration with MS Office
- Customizable Excel-like grids for data entry
- Customizable forms (orders, invoices, statements, etc.)
- Configurable pivot tables for data analysis
- Windows fax/e-mail integration
- Pop-up calendars and calculators
- Windows cut & paste
- Unlimited user-defined fields with auto-fill
- Integrated contact manager
- Convenient on-screen form and report preview
- User-definable menus
- Individual user screen preferences

### KEY FEATURES

**Daily Drilling Entry** / Easily track all drilling expenses by crew and shift. Track time related to foreman, helpers and runners. The time will automatically be used to create payroll. Track materials used such as casing and stabilizers. Track other expenses related to crews and shifts such as cook, helicopter and wedge bonuses. Daily drilling entry is highly specialized for mining and drilling companies.

**Billing Management** / Maestro\* supports all types of construction billing methods including Lump Sum, Progress, Cost Plus, Time & Material, Work Order, Service Call, Order Desk, Point of Sale and Ticket Billing.

**Bonus Calculation** / Define virtually unlimited bonus formulas by trade, region, site and hole. Easily capture number of wedges and meals prepared per shift. Note if a helicopter bonus applies. Maestro\* will automatically calculate bonuses for payroll. Save time and improve accuracy.

**Automatic Overtime Calculation** / Define multiple overtime scenarios such as max regular hours per day/week and max overtime hours per day/week. Link scenarios to various trades and maestro\* will automatically prepare overtime and double-time distribution.

**Detailed Project Analysis** / Analyse every detail of every project site or hole using one of maestro\*'s many analysis tools. Project inquiry, pivotal reporting, custom reports or any of the many standard project reports that come standard with every maestro\* installation will provide you with quick, easy and timely access to the information that you need.

**Project Costing** / Maestro\* offers one of the most sophisticated project cost management tools available today, a single tool that addresses the information analysis requirements of estimating, operations and accounting. With maestro\*'s unique Pivotal Data Viewer, project cost information can be easily viewed in multiple dimensions. All information is shared in real-time between estimating, operations and accounting departments, eliminating redundant databases and spreadsheets. Maestro\*'s project cost management and inquiry module is completely integrated with our other modules, including order change, commitment, billing, projection, production and other management modules.

**MICR Cheque Printing** / Pretty much a standard today, magnetic ink cheques provide a higher level of security against cheque fraud. Maestro\* allows for the printing of supplier and payroll cheques using MICR format.

**Depreciation Management** / This module allows the management of depreciation books according to different recognized methods, in addition to presenting all information regarding each item's value. This module is integrated with maestro\*'s equipment management and general ledger.

**Lien Management** / Contractor liabilities in the construction industry are ever increasing. It is now critically important to equip your team with a software management tool that addresses today's needs, and Maestro\* can track your liens and waivers, minimizing financial risk on projects. Completely integrated with the subcontractors' contract and payables modules, the Lien Management features will allow you to proactively address your risk.

**Document & Contact Management** / Finally, a document management and scheduling solution to help you coordinate the many documents produced for each job. Exclusive to maestro\*, our electronic document management module is fully integrated throughout all other modules. Drawings, site directives, meeting minutes, daily diaries and many other documents can be stored and organized within maestro\*, creating a virtual job book that can be accessed from anywhere.
