

Project Dispatch & Mobility

Make the move away from magnetic boards and spreadsheets to an automated and centralized scheduling system. The maestro*MOBILE Project Dispatch module combined with maestro*Mobility enables you to manage your resources in real-time, ensuring that the right resources are available for the right job at the right time.

By providing the capability to schedule days, weeks, and months in advance, the maestro*ERP Project Dispatch module will provide a clear picture of underutilized resources and double-bookings enabling you to make the necessary changes to avoid unnecessary downtime and unintended expenses.

VARIOUS VIEW SETTINGS

- Time scaling
- Hour, Day, Month
- Screen sections organization

INTEGRATION FEATURES

- Hours scheduled in dispatch can be imported directly to project costing, work orders and payroll.

Billings go out faster as important cost information are returned to the office sooner for processing. This could include labour time, equipment time and even copies of packing slips can affect the accrual costs.

Proper scheduling minimizes the need for rentals due to last minute changes and emergencies, saving you costs and improving the bottom line.

Field communications are improved by incorporating real-time text and email notifications and responses regarding important events putting planners and schedulers in real-time communications with the field regarding resource assignments and resource requests.

Gone are the days of having to tweak general accounting software packages to support the unique project-driven environment of the construction industry.

Leveraging a common platform, every module in Maestro*ERP captures data from various departments and operational groups in your organization and feeds it into a single database where real-time reporting shows exactly how your business is performing.

By constantly monitoring the company's financial vital signs, especially labor, material and equipment costing information, the finance department can track business performance against financial goals and keep other departments and/or business units up-to-date.

Whether you need an executive overview or specific job costing details, Maestro*ERP allows for timely decision making to maximize job profitability and lower risk with control that would please even the most demanding financial executive.
